

# Data Science Platform

We support you on every step of data handling: from collection to advanced analytics.

Platform to explore data, build models, create and share dashboards.

Developed for Data Specialists to allow them focus on getting insights and creating value.

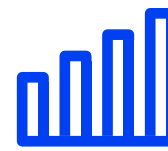

Ready to facilitate your Digital Competences. Focus on analytics, not infrastructure.

Provided in **SaaS model** so you don't have to worry about installation, deployment, maintenance and workflow patterns.

**Easy collaboration** environment for data scientists, domain experts and business users

**Organization growth.** Toolbox for building in-house data science teams

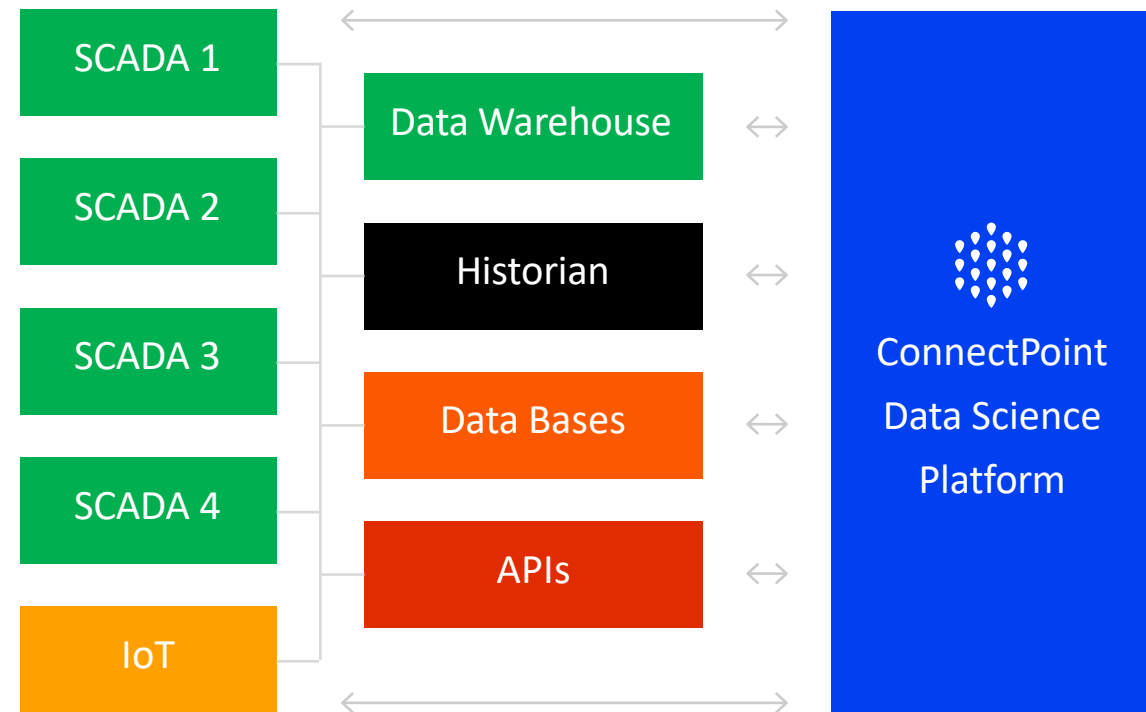

**Easy access to information and analyses results** for non-data scientists with Smart RDM portal

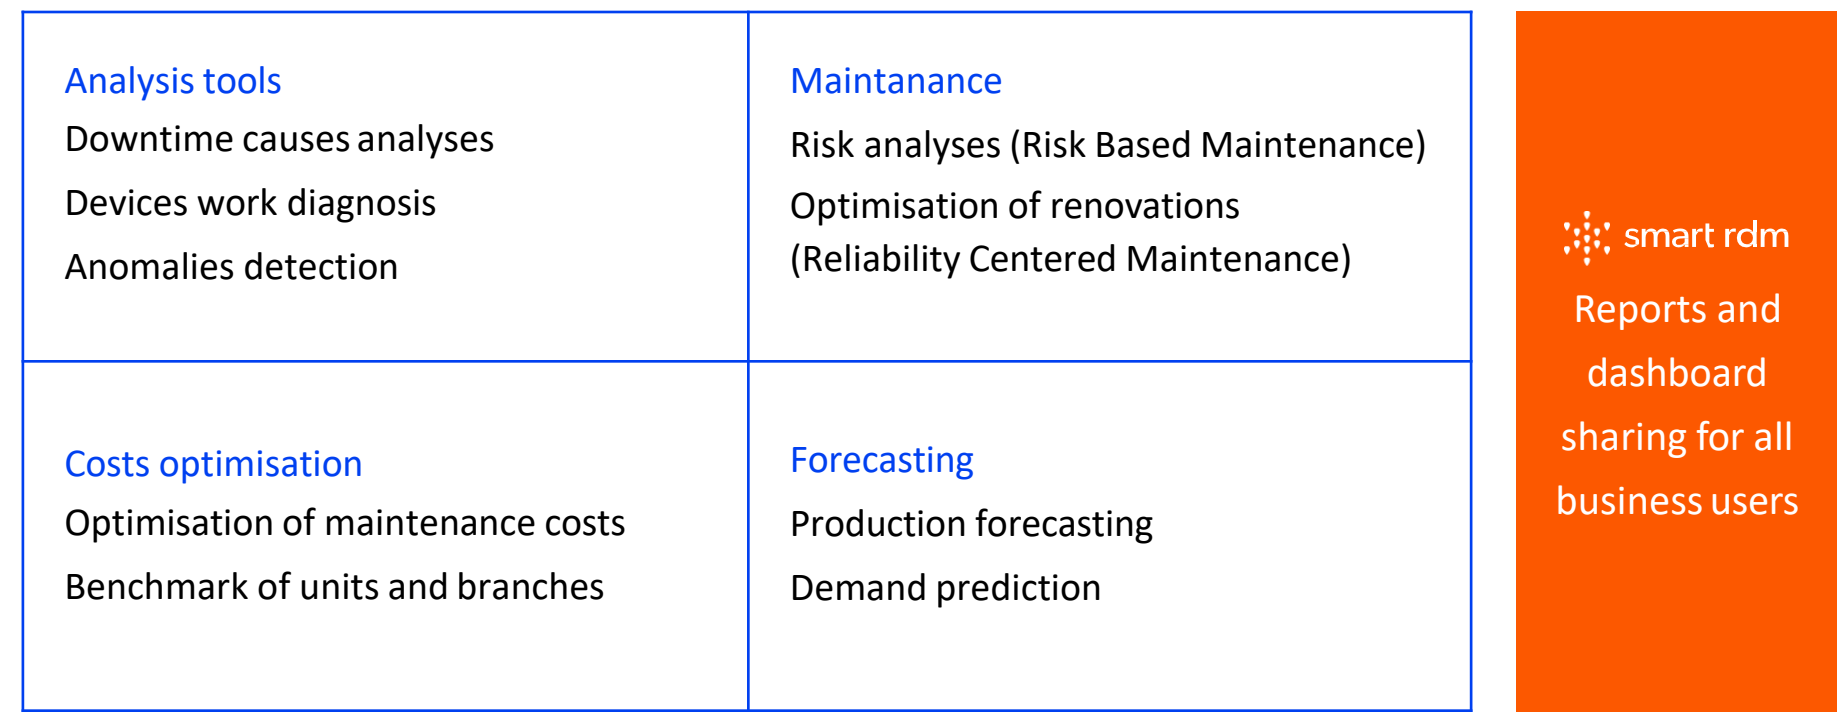

**Digital boost.** Simple integration of all the third party data science providers and startups in one, easy to manage, environment.

# Solution Overview

## Sources

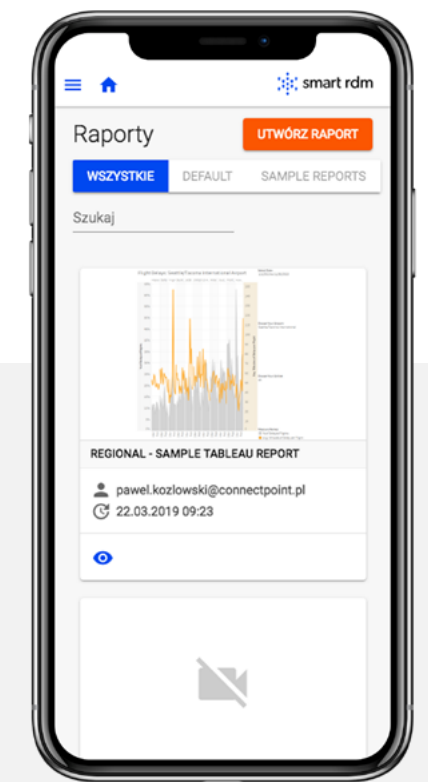

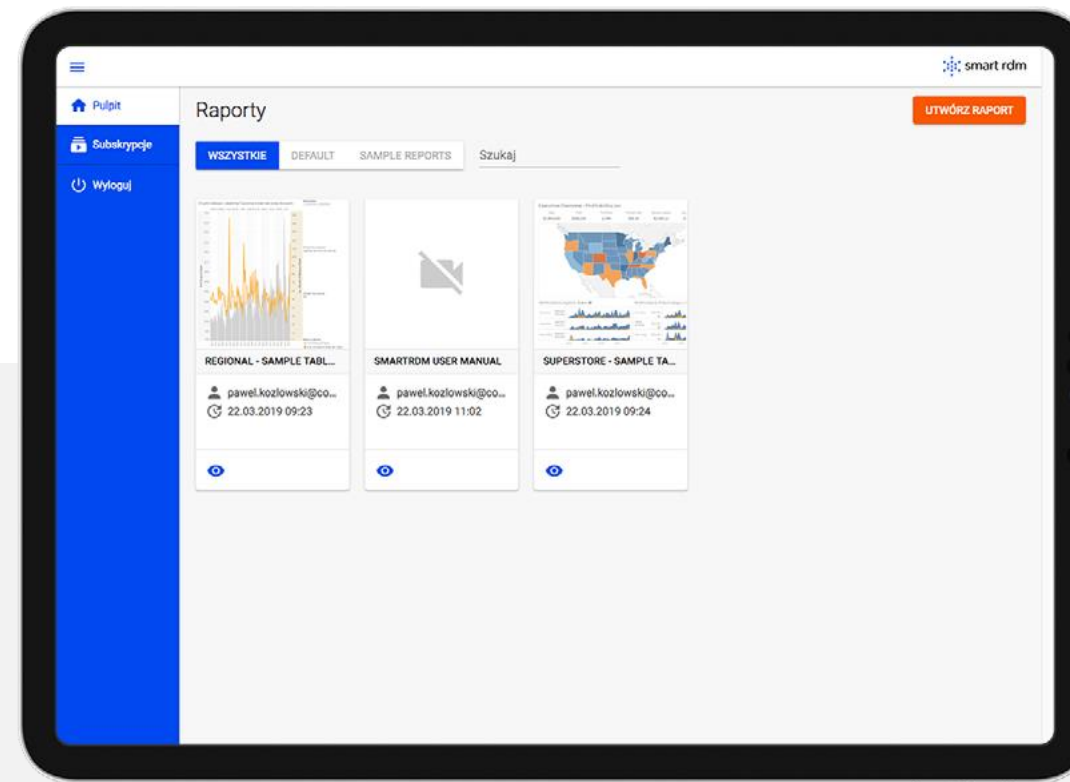

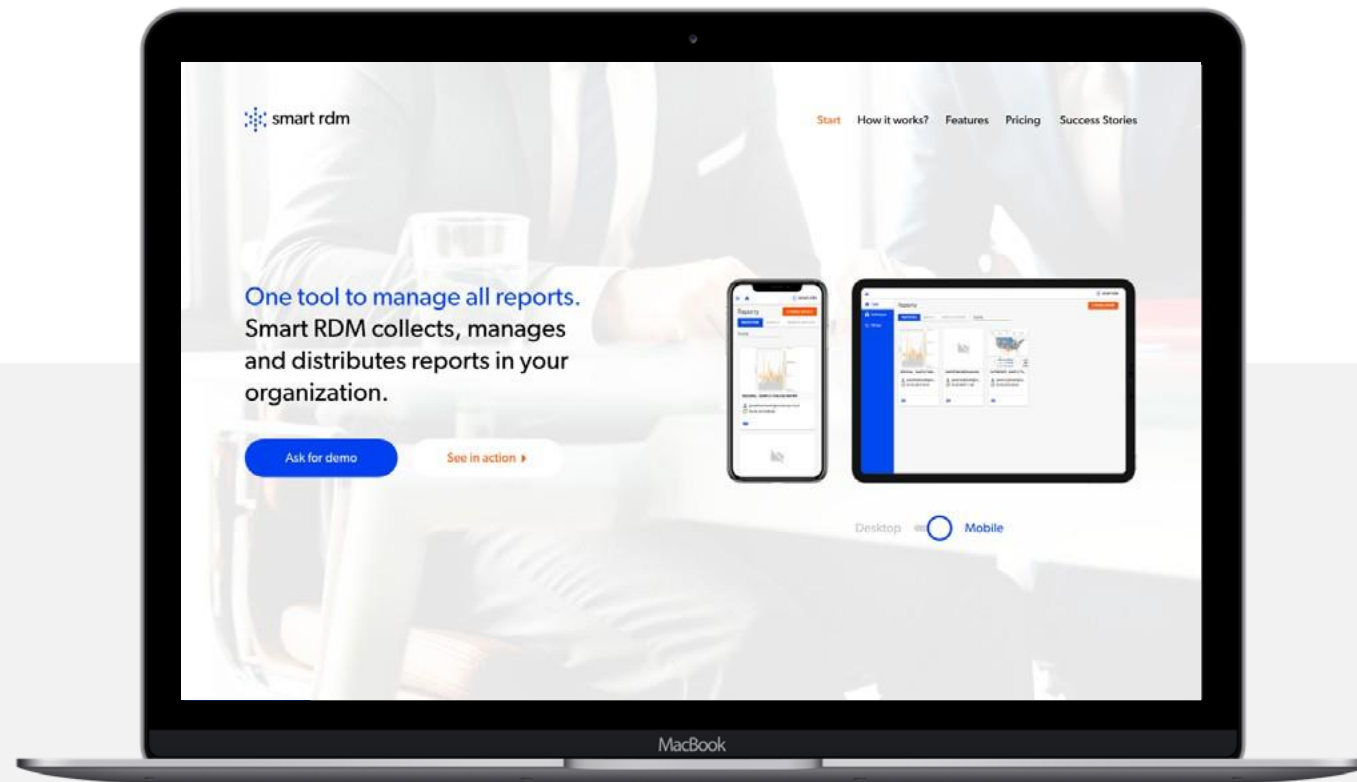

## Use it for

# Data Science Platform

# Smart RDM Interface

Your connected “DataScienceHub”.

You do analyses. We take care of the infrastructure and environment.

## We provide Infrastructure

- » **Predefined set of environments** integrated with SCADA systems, databases, Data Lake solutions, popular historians, OSIsoft PI system and others;
- » **Support for Python, R, Matlab and Scala;**
- » **Scalability** to thousands of simultaneous users;
- » **Easy integration of Artificial Intelligence solutions** prepared by external suppliers;
- » **Easy connection to computation clusters** - Spark, Dask;
- » **Dynamic use of computing power**, which allows competitive price for infrastructure;
- » Smart RDM Portal for **interactive dashboards**, results and models
  - engineers can share their work to business with one click.

## We provide Data Science as a Service

- » On premise or public cloud installations;
- » DevOps support for data science teams;
- » Onboarding of users onto the platform;
- » possibility of 24/7 service level.

## You can share and use the Platform with:

Your Data Science Team

External Specialists,  
Consultants and  
Solution Providers

Our data Science Team

Or everyone above.
